

FOR IMMEDIATE RELEASE:

SecureZIP & PKZIP Offer Day One Certified Support of IBM's Newest z10 Mainframe

Milwaukee, New York, London, Tokyo—February 26, 2008--PKWARE, Inc., the leader in data protection and file management across all major platforms confirmed that both SecureZIP and PKZIP for z/OS completely support IBM's latest mainframe, the z10, on the first day of its release. PKWARE worked extensively with IBM to ensure early adopters of the new generation mainframe that SecureZIP and PKZIP would continue to meet their needs and they could migrate immediately, with full confidence.

SecureZIP for z/OS is used globally to protect mainframe-generated data at rest and in transit, applying strong encryption to files archived into cross-operating system portable .zip files. Customers reduce processing time and expense when using SecureZIP's integration with IBM's hardware cryptographic facilities. Support for IBM's z10 mainframe now allows customers to use hardware cryptographic acceleration for Advanced Encryption Standard (AES) up to 256-bit strength, in addition to the previously available 128-bit strength. This offers additional degrees of durable protection for an organization's sensitive data.

IBM z10 support benefits PKZIP for z/OS customers as well, allowing them to take advantage of profound performance improvements available from the new mainframe's quad-core architecture, greatly reducing the time required to compress files for storage or transfer.

"A number of our customers here in the United States and abroad have made it clear that Day One support for the z10 is critical to their business. Their trust and reliance on PKWARE products is a compliment we prize highly. We worked closely with IBM to ensure customer needs were met, fully and completely," said Joe Sturonas, Chief Technology Officer for PKWARE.

About PKWARE, Inc.

PKWARE, Inc., the largest global software company providing ZIP solutions, is the creator and continuing innovator of the ZIP standard. PKWARE products are used to ensure the security and portability of data internally, as well as with partners, across all major platforms. Hundreds of global organizations in financial services, banking, retail, healthcare, government, and manufacturing use PKWARE services daily. PKWARE products provide unmatched scalability, ease of use and deployment, making them the most cost-effective means of securing data and complying with industry regulations. PKWARE, a privately held company, is based in Milwaukee, WI with offices around the world. PKWARE Japan K.K. serves the Asia Pacific market including China, South Korea, Singapore, Taiwan, and Malaysia from its offices in Tokyo.
